

How to Install Email on Android

This guide explains how to install Green Trail Hosting Webmail on your Android device so you can access your email directly from your home screen or apps menu.

If you are using an iPhone or iPad instead, follow the [How to Install Email on iOS](#) guide.

Open Webmail in Chrome

On your Android device, open **Google Chrome**.

In the address bar, go to **email.yourdomain.tld**, replacing **yourdomain.tld** with your own domain name.

 mail.folkhosting.com

Green Trail Webmail • [Get support](#)

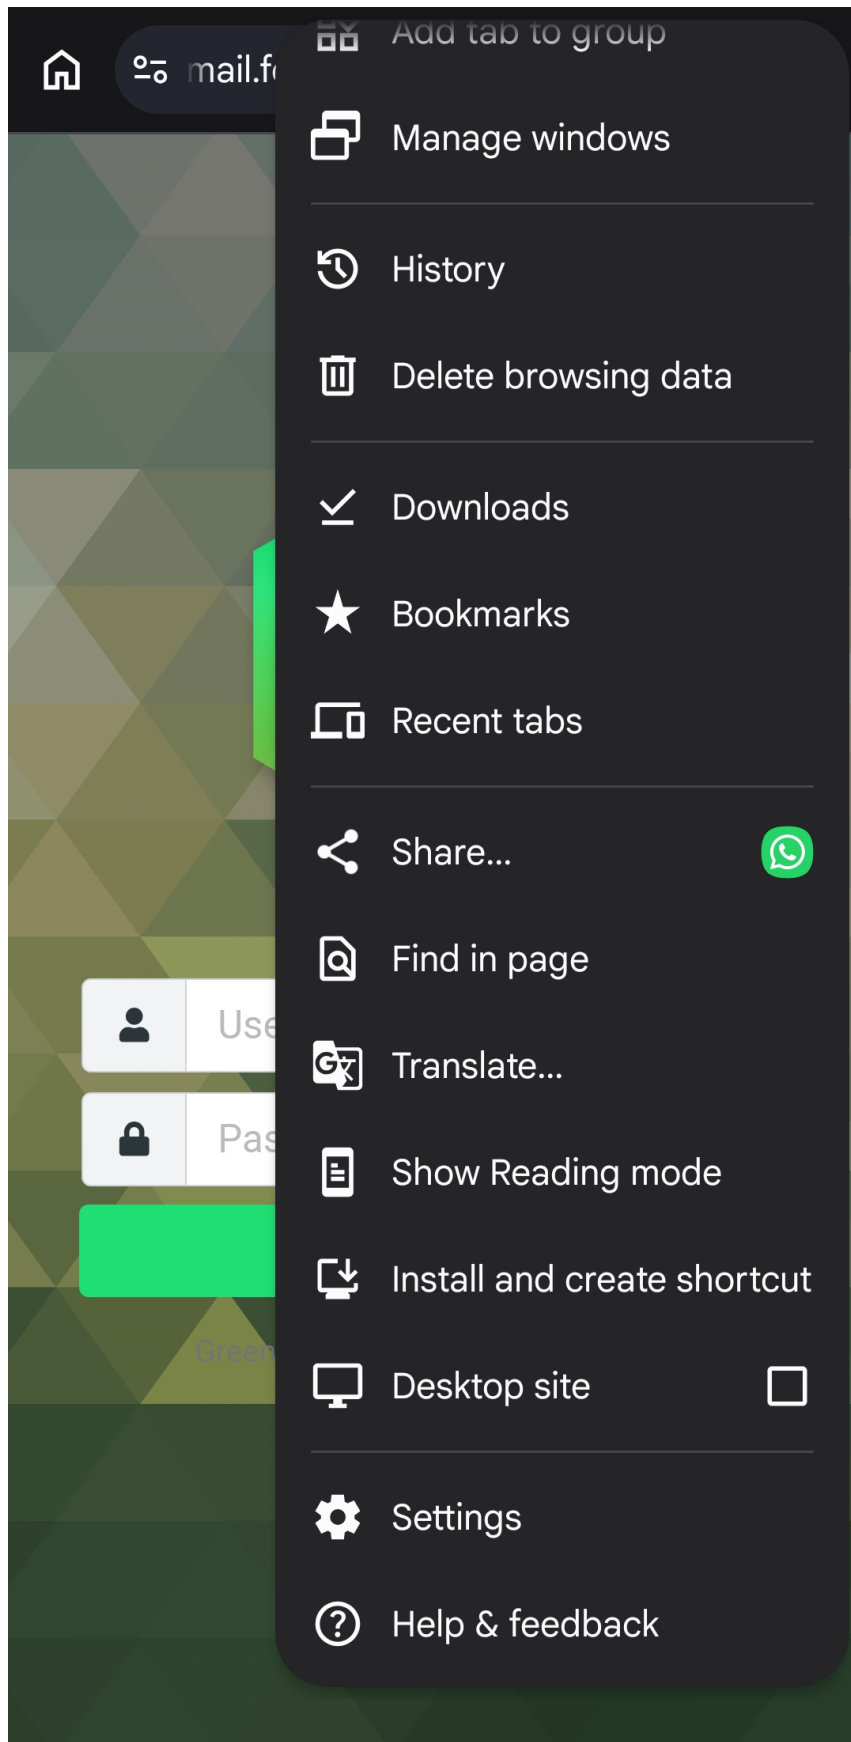

Install GTH Webmail

Tap the **three-dot More menu** in the Chrome address bar.

From the menu, tap **Install and create shortcut**.

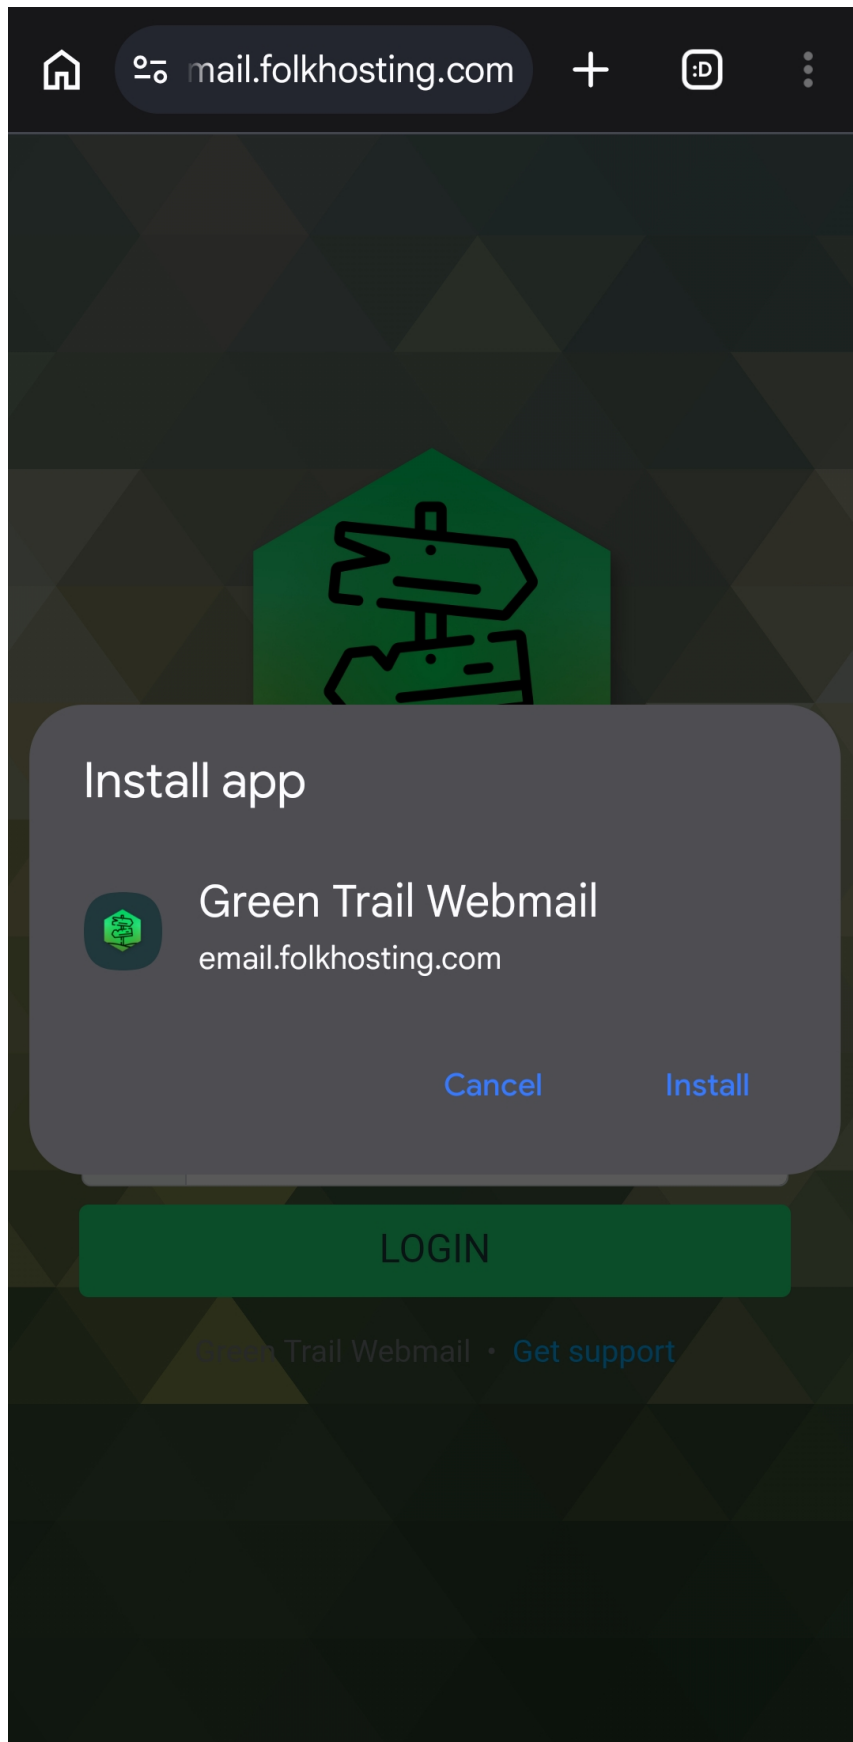

A confirmation window will appear. Tap **Install**.

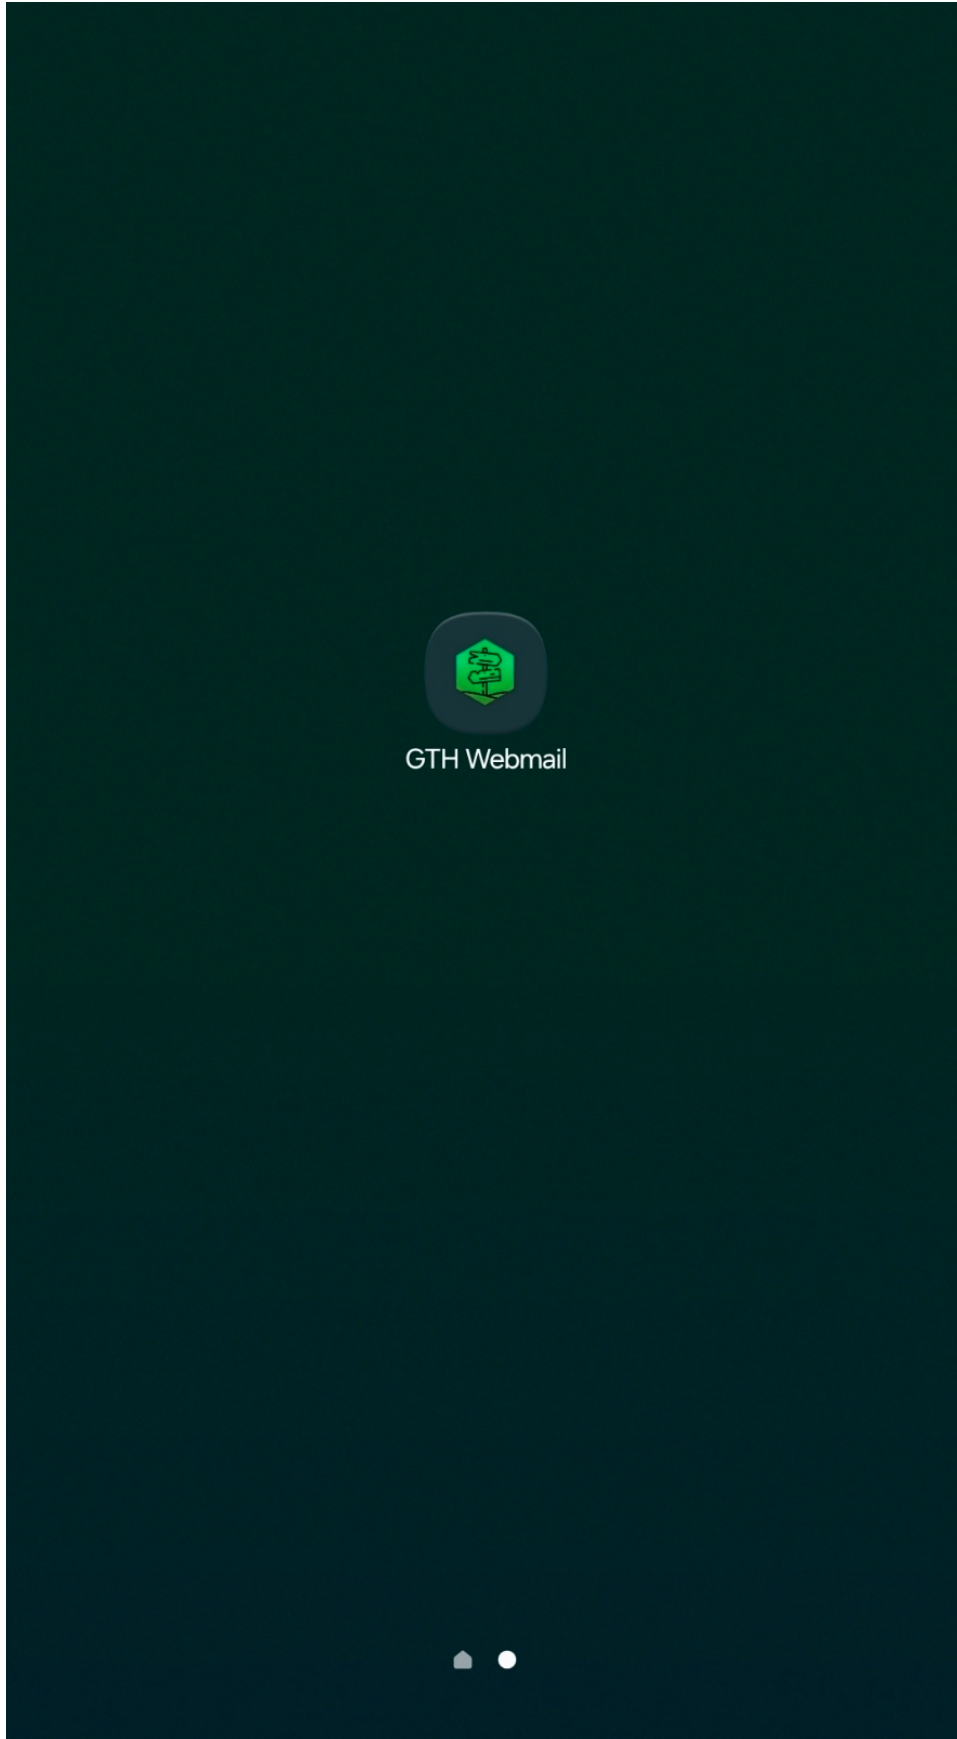

Open GTH Webmail

Once installation is complete, a new app called **GTH Webmail** will appear on your home screen or in your apps menu.

Tap **GTH Webmail** to open it.

You will be prompted to log in using your email address and email password.

Access Your Inbox

Once you have logged in, your inbox will open and you can use GTH Webmail directly from your Android device.
