

How to Install Email on iOS

This guide explains how to install Green Trail Hosting Webmail on your iPhone or iPad so you can access your email directly from your Home Screen.

If you are using an Android device instead, follow the [How to Install Email on Android](#) guide.

Open Webmail in Safari

On your iPhone or iPad, open **Safari**.

In the address bar, go to **email.yourdomain.tld**, replacing **yourdomain.tld** with your own domain name.

Add GTH Webmail to Your Home Screen

Tap the **More** button in Safari, then tap **Share**.

Depending on your Safari layout, you may see the **Share** button directly instead.

Scroll down through the sharing options and tap **Add to Home Screen**.

Make sure **Open as Web App** is turned on, then tap **Add**.

Open GTH Webmail

Once added, a new app called **GTH Webmail** will appear on your Home Screen.

Tap **GTH Webmail** to open it.

You will be prompted to log in using your email address and email password.

Access Your Inbox

Once you have logged in, your inbox will open and you can use GTH Webmail directly from your iPhone or iPad.
